

Newsletter

October 2023

We want to welcome you to autumn and share exciting news, tips, and inspiration to help you find right solution for your application. In this newsletter, we have exciting content regarding seminars, products and how to save energy

Save Energy and Money.

Measuring temperature and vibration accurately and precisely is crucial for effectively saving energy. Here are some key aspects to consider regarding the benefits of accurate measurement of temperature and vibration:

Optimized Machine Performance: By measuring vibrations in machinery and equipment, one can detect early signs of deviations and wear. This allows for timely preventive actions, reducing unnecessary energy consumption and avoiding costly repairs.

Effective Heating Control: By measuring temperature accurately, you can ensure that heating systems are only used when necessary. This prevents excessive heating and, in turn, reduces energy consumption.

Monitoring Energy Consumption: By continuously monitoring temperature and vibration, insights into energy consumption over time can be gained. This allows for identifying areas where energy is being wasted and taking measures to improve efficiency.

In summary, accurate and precise measurement of temperature and vibration plays a crucial role in saving energy. It helps optimize machine performance, cooling and heating systems, building energy use, and production processes, ultimately reducing energy consumption and contributing to a more sustainable and cost-effective operation.

KP A/S has a wide range of high-quality sensors for every application to help you lower your costs.

Contact us to find right solution for you.

Seminars

During October we will organize a seminar with a major Pharma company in Denmark regarding temperature measurement, sensor selection, materials, communication, and more.

The outcome is to gain a deeper and broader understanding of concepts and various types of sensors that can be used.

If you are interested in seminars, let us know and we will customize a seminar for your company.

Europort Rotterdam 9/11-2023

KP A/S is looking forward to visit the Europort trade fair in Rotterdam and will also be hosting an exciting presentation on the Smart Stage in hall 6.

During the presentation, we will introduce our innovative motion sensor KPM100 and share our latest advancements and insights in this field.

We are eager to share our knowledge and expertise with the attendees of the fair and look forward to meeting industry colleagues and partners during the event.

If you are visiting Europort in Rotterdam and would like to meet us, please let us know

Did you know?

KP A/S has successfully supplied over 1.4 million USDA-sensors for measuring temperature of sustainable food transportation across the globe!

If you would like to know more, or have a demonstration of our products, please contact:

Ole +45 2124 5472, oem@kp-as.com or Stefan +46 725 266 638, stg@kp-as.com.

You can also contact our HQ in Copenhagen at +45 3976 0203 or sales@kp-as.com.
