

REACH Declaration of Compliance

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 and Annex XVII dated 11 May 2026 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH).

REACH stands for Registration, Evaluation, Authorization and Restriction of Chemicals.

REACH is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals, while enhancing the competitiveness of the EU chemicals industry. It also promotes alternative methods for the hazard assessment of substances to ensure reduction of the number of tests on animals.

In principle, REACH applies to all chemical substances; not only those used in industrial processes but also in our day-to-day lives, for example in cleaning products, paints as well as in articles such as clothes, furniture and electrical appliances. Therefore, the regulation has an impact on most companies across the EU.

REACH places the burden of proof on companies. To comply with the regulation, companies must identify and manage the risks linked to the substances they manufacture and market in the EU. They have to demonstrate to ECHA how the substance can be safely used, and they must communicate the risk management measures to the users.

If the risks cannot be managed, authorities can restrict the use of substances in different ways. In the long run, the most hazardous substances should be substituted with less dangerous ones.

Kjørulf Pedersen A/S hereby declares that the products included in the provision, manufacture, and sale comply with the requirements of REACH.
