

RESISTANCE THERMOMETER

Measuring insert: Fixed

Type: RT-AUI

5456-E300824V3.3

Application:

- Measurement of temperatures in closed pipelines and containers with gaseous or liquid media, e.g. air, steam, gas, water or oil.
- Field of application: up to 600°C, max. 50 bar and media velocities of up to 25 m/sec
- Typically applied in:
 - Processing plants
 - Power plants
 - District heating, energy distribution

Properties:

- Pt100 and Pt1000 resistance thermometer in acc. with IEC 60751
- Mechanical and thermal stress in accordance with DIN 43772
- Process attachment: Adjustable coupling, thermowell or flange
- Measuring insert: Fixed, short reaction time
- Outer protective sheath: Stainless acid-proof steel
- Modular construction and standard length minimizes the number of spare parts
- Can be delivered with head mounted transmitter

MECHANICAL SPECIFICATIONS

Protective sheath: -----

EN 1.4571 (AISI 316Ti) max. 850°C
Other on request

Sensor diameter Ø [mm]: -----

Ø6 / Ø8 / Ø9 / Ø11 / Ø15
Other on request

Immersion length L1 [mm]: -----

50 / 100 / 150 / 200 / 250 / 300
Other on request

Process attachment: -----

1/4" BSP Adjustable coupling (max. Ø9mm)
1/2" BSP Adjustable coupling
1/2" NPT Adjustable coupling
3/4" BSP Adjustable coupling
1" BSP Adjustable coupling (min. Ø11mm)
Other on request

Protection head: -----

B (aluminium (Al), enamelled, low cap, IP62)

BH (Al, enamelled, high cap, IP62)

BSB (Al, tilting lid w/screw, low cap, IP65)

BSBH (Al, tilting lid w/screw, high cap, IP65)

BSBH-W (Al, tilting lid, high cap, digital display (excl. tr.), IP65)

CE (Al, enamelled, screw cap, IP68)

BSP (plastic, black, screw cap, IP54)

BRF (stainless steel, screw cap, M20x1.5, IP67)

BRF-EEX (stainless steel, screw cap, M20x1.5, IP67)

B-SRF (sanitary, stainless steel, screw cap, M20x1.5, IP67)

Other on request

Cable gland (pre-mounted): -----

None (standard – cable entry M20x1.5)

Plastic

Nickle plated brass

Stainless acid-proof steel

Please specify cable diameter: -----

ELECTRICAL SPECIFICATIONS

---Plug (pre-mounted In Head):

M12 (for M20)
Harting (specify type)
Other on request
None

---Cable (pre-mounted in Head):

SS (Silicone-Silicone) max. 180°C
SBS (Silicone-Inner Braided-Silicone)
TBT (Teflon-Inner Braided-Teflon)
None

---Cable length [m]:

---Sensor element:

1xPt100
2xPt100
1xPt1000 (only cl. B 1/1 and cl. A)
2xPt1000 (only cl. B 1/1 and cl. A)

---Number of conductors:

2-wire (recommended only for Pt1000)
3-wire
4-wire

---Media temperature max:

+180°C
+250°C
+400°C
+600°C (only cl. B 1/1 Pt100 and Pt1000)

---Tolerance in acc. with IEC 60751:

Type A DIN (i.e. $\pm(0,15+0,002 \times \text{Tactual})$ °C)
Type B 1/1 DIN (i.e. $\pm(0,3+0,005 \times \text{Tactual})$ °C)
Type B 1/3 DIN (i.e. $\pm(0,1+0,0017 \times \text{Tactual})$ °C)
Type B 1/6 DIN (i.e. $\pm(0,05+0,00083 \times \text{Tactual})$ °C)
Type B 1/10 DIN (i.e. $\pm(0,03+0,0005 \times \text{Tactual})$ °C)

RESISTANCE THERMOMETER

Measuring insert: Fixed

Type: RT-AUI

5456- E300824V3.3

Calibration:

Temperature calibration are used to verify and certify the sensor to have the correct accuracy. We can do either: "In house" or "Accredited" calibration. Accredited is certified by 3.e part. Normally we do a calibration in 3 points.

Enhanced performance services:

Cold applications (below -50°C) will influence the material and the measurement. CRYO treatment is needed to ensure a correct and working sensor down to -196°C.

A sensor will always drift over time, especially when there are high temperature fluctuations.

With "Ageing treatment" we stabilize the sensor to ensure a minimum drift over time. The benefits are long term stability, more correct measurement and easier planning of calibration periods.

Documentation:

Please order the correct documentation when ordering the sensor.

SIGNAL PROCESSING

Ceramic socket mounted in terminal head. -----

Prepared for transmitter w/o ceramic socket. -----
w/long leads

Programmable head mounted transmitter-----

Measuring range min/max: -200/+850°C
Output: 2-wire, 4-20 mA
Min. span: 25°C
Ambient temperature min/max: -40/+85°C

THERMOCOUPLE THERMOMETER

Measuring insert: Fixed

Type: TC-AUI

5356-E070525V3.2

Application:

- For measuring temperatures in closed pipelines and containers with gaseous or liquid media, e.g. air, steam, gas, water or oil.
- Field of application: up to 1250°C (depending on thermocouple)
- Usually applied in: tile works, refuse disposal plants, processing plants, power plants, district heating, energy distribution.

Properties:

- Thermocouple thermometer type K, J, N, T or E
- in acc. with IEC 60584-1
- Constructed in accordance with DIN 50446
- Measuring insert: Fixed
- Process attachment: Adjustable coupling
- Outer protective sheath: Heat-proof steel or stainless acid-proof steel
- Modular construction and standard length minimize the number of spare parts
- Can be delivered with head mounted transmitter
